PROFESSIONAL SUMMARY

Over 4 years working with Microsoft technologies. I started my career at Program Consultores, maintaining municipal management systems built with Classic ASP, WebForms, and ASP.NET MVC, and developing new functionality directly in .NET Core, with TypeScript. Today, at Baufest for Cencosud SA, I combine Angular on the frontend with APIs in .NET Framework — SQL Server is a constant across both roles. In parallel, on freelance projects, I work with React, Next.js, Node.js, and MongoDB. I use GitHub Copilot and Claude daily to write code, debug, and document.

TECHNICAL SKILLS

Languages: C#, Javascript, TypeScript, VBScript
Frontend: Angular, React, Next.js, HTML, CSS
Backend: ASP.NET MVC (.NET Framework & .NET Core), ASP.NET Web API (.NET Framework), WebForms (.NET Framework), Classic ASP, Node.js, REST APIs
Databases: SQL Server, MongoDB
Data Access: Entity Framework, ADO.NET
AI Tools: GitHub Copilot (VS Code), Claude — daily use for coding, debugging & docs
Other: Agile/Scrum, Crystal Reports, iReport

WORK EXPERIENCE

Software Developer — Baufest (Client: Cencosud SA) *Sep 2025 – Present*

Technologies: *.NET Framework, Entity Framework, Angular, Typescript, SQL Server, Crystal Reports, iReport.*

- Develop frontend features with Angular and backend services/APIs with .NET Framework for Cencosud SA's corporate apps.
- Data access to SQL Server with Entity Framework (both EDMX models and code-based directly), consuming every read and write operation through stored procedures.
- Gathering and analyzing functional requirements in agile sprints, participating in planning and code reviews to ensure delivery within estimated timelines.
- Generate business reports using Crystal Reports and iReport.

Software Developer — Program Consultores SA *Oct 2022 – Jun 2025*

Technologies: *ASP.NET MVC(Core y Framework), WebForms, Classic ASP, ADO.NET, TypeScript, SQL Server.*

- Maintenance and evolution of municipal management systems built with Classic ASP and ASP.NET WebForms, including bug fixes and new feature development on top of those systems.
- Development of new functionality directly in .NET Core with MVC architecture, for the modules that were being modernized.
- Use of Typescript for client-side interactivity in Razor views.
- Data access with ADO.NET (SqlConnection) and dynamic queries built with StringBuilder.

Software Developer — Freelancer *Dec 2024 – Present*

Technologies: *React, Next.js, Node.js, MongoDB, Mercado Pago API*

- Mates Project: Full stock management system with real-time inventory, shortage alerts and production planning.
- MLS Comercio Internacional: Informational website with videos, contact forms, and Mercado Pago integration for sales. Live at mlscomex.com.

EDUCATION

Information Systems Engineering — UTN FRC *2017 – 2021*
3/4 years completed.

LANGUAGES

Spanish — Native **English** — B1 Intermediate (actively improving)
